△ Depending on the fragrance type, 1 litre of fragrance equals 0,83 - 1,1 kilograms.
For more information, contact our team.

Tips:

- Always use safety gloves and protective face mask when working with fragrances.
- Add the fragrance right before casting the paraffin and mix well. The paraffin temperature should be between 70°C and 85°C.
- If possible cool the mixture quickly so that the fragrance does not evaporate.
- The recommended concentration of the used fragrance is 1,5% to 4%.
- Store the fragrance in a well-closed container at room temperature.

OTHER

№	Name	Application	Price in EUR, excluding VAT		
			50 pcs	200 pcs	
59	Wick sustainer for wicks Ø 2.5 mm	For candles in containers and some molded candles		0,92	2,98
60	Wick sustainer for wicks Ø 3.0 mm			0,92	2,98

Tips:

- In order to determine a suitable wick for your candles, carefully consider the diameter of the candles, the method of manufacture, and the wax mixture. If the wick is too small compared to the diameter of the candle, dipping occurs. If the wick is too big, there is additional smoke while burning.
- For the best results, make tests and samples in advance.
- To evaluate the burning quality of the ready candle, light the candle and allow it to burn continuously for 2 to 5 hours in a suitable room,
- Before lighting the candle, make sure that the wick is trimmed at up to 1 cm. Longer wick can cause burning deviations.

№	Cat. №	Color	Price in EUR/package, excluding VAT	
			0,2l	1l
96	Gold lacquer	gold	10,96	37,10
97	Silver lacquer	silver	10,96	37,10
98	Colorless lacquer	-	5,23	18,00

Tips:

- Always use safety gloves when working with dyes.
- The actual color of the dye can only be established by assessing a ready candle. Different paraffin blends and some fragrances can change the color of the candles, even when a specific dye is used at a predetermined concentration.
- It is recommended to dissolve the dye in paraffin with temperature between 85°C and 95°C. Higher temperature can also cause color deviations.
- Use an electronic scale to accurately weigh the dyes.
- To fully dissolve the paint, use an electric mixer.
- Store the dyes in a dry room at room temperature.

***The above prices DO NOT include VAT**

The minimum order quantity for colored paraffin blends in the form of slabs is one slab. The slabs are rectangular in shape and weigh 5-7 kg.

The minimum order quantity for colored paraffin blends in the form of granules is 5 kg.

Tips:

- Melt the paraffin and paraffin mixtures in a water bath.
- Combine the colored paraffin waxes with our wicks and fragrances for the best results.
